LITERACY **PLUS** is a not-for-profit organization that believes education increases an individual's self-esteem, motivation, and self-confidence. Education improves job skills which in turn opens doors and opportunities for homeless adults in today's working world.

Literacy **PLUS** helps adults who have limited reading and math skills by providing them with a one-on-one tutor. Our goal is to help develop skills that will assist them in getting employment and advancing in the job they currently hold.

Plans are in progress to expand the Literacy **PLUS** programs to other facilities who work with underserved homeless in Indianapolis.

"I want to help myself be more independent and do something with my life." Joe Young
